<b>Address</b>	25 Leslie Hills Drive, Riccarton, Christchurch 8011
<b>Website</b>	<a href="http://www.belgotex.co.nz">www.belgotex.co.nz</a>
<b>Email</b>	<a href="mailto:info@belgotex.co.nz">info@belgotex.co.nz</a>
<b>Phone</b>	0800-377-753

### Description of Building Product

Belgotex NZ supplies a range of [Needlepunch Carpets](#) for installation and use as garage carpets or as flooring in commercial or industrial environments.

Needlepunch Carpet is a type of textile flooring made by mechanically punching synthetic fibres with a needle board through a primary backing material. Made in a wide loom, Needlepunch Carpet is designed for wall-to-wall installation.

When installed, Needlepunch Carpet may contribute to G6 (Airborne and impact sound). Compliance with this requirement needs to be established as part of the proposed flooring system.

Needlepunch Carpets are supplied in full rolls measuring 2.0m, 3.0m, 4.0m, or 4.2m in width. Partial rolls are also available on request.

### Building Code Obligations

When installed in accordance with Belgotex NZ installation requirements, Needlepunch Carpet may contribute to compliance with the applicable performance criteria under the following Building Code clauses.

<b>Building Code Clause</b>	<b>Contribution to Compliance</b>
B2 (Durability) B2.3.1(c)	Durability under residential or commercial use has been established through evaluation to EN 1307. Belgotex NZ Needlepunch Carpet products are manufactured under an ISO 9001 certified Quality Management System and have been reliably supplied and installed in buildings in New Zealand for over 15 years, demonstrating a strong track record of in-service performance.

C3 (Fire affecting areas beyond the fire source) C3.4(b)	Belgotex NZ Needlepunch Carpet is not considered a foamed plastic or combustible insulating building material. Therefore, there are no requirements for Needlepunch Carpet in SH risk group buildings as outlined in C/AS1 4.2.1.1. Critical Radiant Flux (CRF) values have been determined for most Needlepunch Carpet products through testing to ISO 9239-1:2010. For specific CRF values, refer to the <a href="#">Needlepunch Carpet range statement</a> . Suitability in non-SH risk group buildings depends on use and whether the building is protected by an automatic sprinkler system.
D1 (Access routes) D1.3.3 (d)	Belgotex NZ Needlepunch Carpet has acceptable slip resistance when used in level access routes, slopes, and stairs as per D1/AS1 Table 2.
F2 (Hazardous building materials) F2.3.1	Low emission of volatile organic compounds (VOCs) has been established through Global GreenTag or GUT certification.

### Scope of use and Limitations

Scope	Limitation
