

Designated Building Product: **Class 1**

Version 2.0 August 2025

Declaration

Belgotex New Zealand Ltd (Belgotex NZ) has provided this declaration to satisfy the provisions of the [Building \(Building Product Information Requirements\) Regulations 2022](#).

Company Details

Name	Belgotex New Zealand Limited
Role	Supplier
NZBN	9429038353000
Address	25 Leslie Hills Drive, Riccarton, Christchurch 8011
Website	www.belgotex.co.nz
Email	info@belgotex.co.nz
Phone	0800-377-753

Description of Building Product

Belgotex NZ supplies a range of [Rubber Flooring & Acoustic Underlay](#) for installation and use in commercial environments.

Rubber Flooring is a resilient floorcovering made from recycled rubber, available in roll form for wall-to-wall installation.

Acoustic Rubber Underlay is a sheet underlay composed of recycled rubber, also supplied in rolls. It is designed to be installed beneath various flooring types, including carpet, vinyl, ceramic tiles, laminate, and timber flooring, to enhance acoustic performance.

Acoustic Rubber Underlay can be installed either loose laid or adhered directly to the substrate. It is available in full roll lengths, with select colours and thicknesses also offered by the linear metre.

When installed, Rubber Flooring & Acoustic Underlay may contribute to G6 (Airborne and impact sound). Compliance with this requirement needs to be established as part of the proposed flooring system.

Building Code Obligations

When installed in accordance with Belgotex NZ installation requirements, Rubber Flooring & Acoustic Underlay may contribute to compliance with the applicable performance criteria under the following Building Code clauses.

Building Code Clause	Contribution to Compliance
B2 (Durability) B2.3.1(c)	Belgotex NZ Rubber Flooring & Acoustic Underlay have been reliably supplied and installed in buildings in New Zealand for over 15 years, demonstrating a strong track record of in-service performance.

C3 (Fire affecting areas beyond the fire source) C3.4(b)	Critical Radiant Flux (CRF) value of 2.6 kW/m ² has been determined for Jazz Rubber flooring through testing to ISO 9239-1. Jazz Rubber flooring can be used in all building areas and risk groups except unsprinklered exitways, sleeping areas, and treatment rooms in SI Risk Group (Care or detention) buildings.
D1 (Access routes) D1.3.3 (d)	Jazz Rubber flooring has acceptable slip resistance—as per D1/AS1 Table 2—when used in level access routes, slopes, and stairs expected to remain dry under normal use. Jazz Rubber flooring has demonstrated Slip Resistance Value (SRV) greater than 39 in accordance with AS 4586 Appendix A and is therefore acceptable for use in level access routes expected to become wet with water in normal use.
F2 (Hazardous building materials) F2.3.1	Low emission of volatile organic compounds (VOCs) has been established through testing to ASTM D5116.
